ABBYY  
Digital Intelligence for Healthcare

Can you afford not to know how 100% of your healthcare processes are performing, 100% of the time?

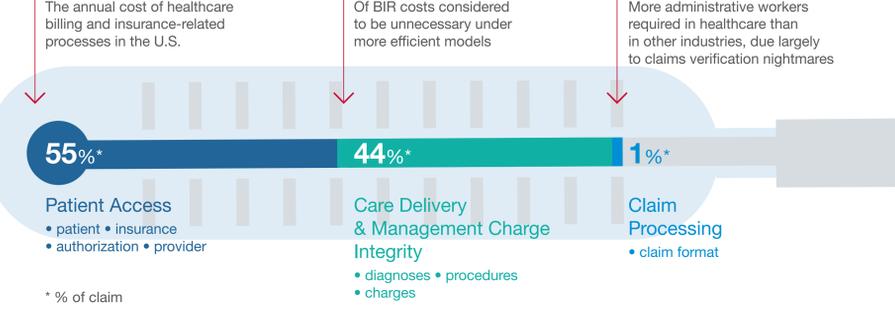

ABBYY  
Digital Intelligence for Healthcare

Healthcare providers are being asked to do more with less amid tremendous complexity.

With the proliferation of investments in EHR and other technologies, administrators and clinical teams are being inundated with dashboards and reports. Despite having all the information, they are often forced to make crucial operational decisions without complete insight.

## Healthcare Revenue Cycle Costs Continue to Rise Due to Complex Processes

**\$ 496 B**  
The annual cost of healthcare billing and insurance-related processes in the U.S.

**15%**  
Of BIR costs considered to be unnecessary under more efficient models

**7.7x**  
More administrative workers required in healthcare than in other industries, due largely to claims verification nightmares

## Can you identify where process improvement should begin?

## There's a wealth of information contained within healthcare systems...

ABBYY  
Digital Intelligence for Healthcare

It's time to get more value out of the data that you already have

ABBYY  
Digital Intelligence for Healthcare

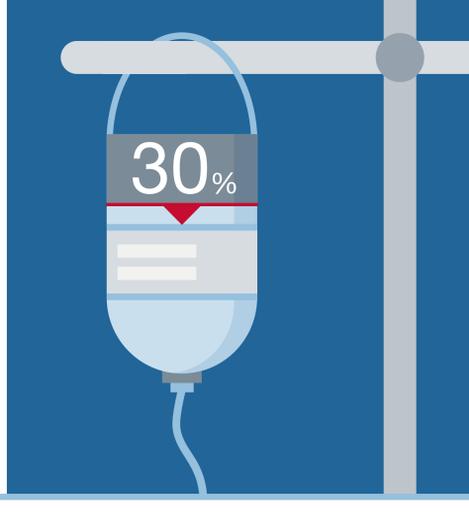

Optimize revenue cycle management, document processing, and your patient experience

ABBYY  
Digital Intelligence for Healthcare

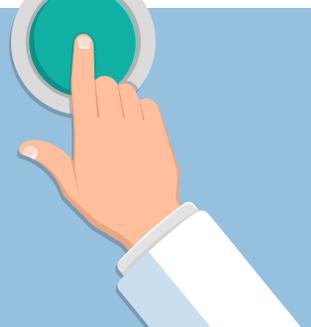

- End-to-end process visualization
- Customer journey visibility
- Automated capture of patient information
- Quicker, faster claims and billing
- Compliance risk management
- Existing patient data integrated into EHR workflows

“By 2024, organizations will **lower operational costs by 30%** by combining hyperautomation technologies with redesigned operational processes” **Gartner**
