How to (Finally) Achieve Procure-to-Pay

What is procure-to-pay?

Procure-to-pay (P2P) is a system covering the entire process of acquiring goods and services, from product selection all the way to payment.

THE P2P PROCESS

Most organizations have recognized that handling P2P manually...

... is slow, inefficient, and prone to errors.

...requires frequent handoffs between departments.

... prevents visibility into the cash flow process.

of AP organizations still function on paperbased processes, even when invoices arrive electronically

average annual cost per U.S. business to deal with P2P friction issues

average hours each U.S. business wastes on P2P issues per week

But attempts at P2P automation often fail because businesses are taking a data-driven approach to a document-driven problem.

The P2P process runs on the data contained within many different documents:

That's why attempting to automate P2P with a data-based approach has historically failed.

of Supply Chain professionals we surveyed said the technology didn't work as intended or was never used

DATA-DRIVEN APPROACH TO P2P

Technologies such as artificial intelligence, business intelligence, and optical character recognition applied without visibility and insight into the way data from documents are forwarding the process.

DOCUMENT-DRIVEN APPROACH TO P2P

Understanding document data and how it fuels the process to finally enable the real-time processing of payments and cash required for P2P: Intelligent **Document Processing (IDP).**

Intelligent Document Processing (IDP): the holy grail of P2P automation

Documents are both records and decision points, which require more than simple data extraction. They also require skilled understanding, decisionmaking, and more importantly, decisions made in context.

Essential skills of Intelligent Document Processing:

Skilled reading of documents

Understanding of document content

Extracting insights to make smart decisions

Real-life results of intelligent accounts payable automation:

400%

increase in employee productivity

12%

fewer late payments

30%

less time responding to inquiries

81%

faster invoice processing time 91% lower invoice

processing costs

Make P2P a reality with ABBYY Vantage

ABBYY introduced the industry's first **low-code / no-code Intelligent Document Processing platform**, ABBYY Vantage. With pre-trained "Document Skills" available in the <u>ABBYY Marketplace</u> for essential AP documents, shipping and logistics documents, and more, Vantage makes IDP accessible within minutes.

ABBYY

Adapt on the fly

FAST

Low-code / no-code

Pre-trained

Achieving P2P is within your reach! Learn how you can get started today with ABBYY Vantage
